**Question-1.**

Split this string

s = "Hi there Sam!"

**Solution:**

```
s.split(' ')
```

The second cell contains the code `s.split(' ')` and is also marked with a green checkmark and the output `[3]`. Below the second cell, the resulting list `['Hi', 'there', 'Sam!']` is displayed.

**Question-2.**

Use .format() to print the following string.

Output should be: The diameter of Earth is 12742 kilometers.

**Solution:**

```
